

CaseMate is the Brand Protection hub for your anti-counterfeiting activities. By working in its centralized database, the overview and statistics help brand owner making strategic decisions. Start using this intelligent tool and speed up your work against counterfeits!

All stored in one place

CaseMate make it possible to run the entire anti-counterfeiting activities in one place.

Registration

A simple case input with all key facts of a case. Information will be stored in a structured and safe way.

Tracking

Tracking each step in the workflow gives a good overview and simplifies for the user; it also helps the Brand Protection team to collaborate with external parties and work more efficiently.

Intelligence and Statistics

The statistic tool make it possible to map all counterfeit cases and find connections or trend among targets. Additionally there is a support for generating different types of reports and letters.

System structure

CaseMate

An internal case management solution that provide simple case input and clear overview and monitoring of all cases. Possibility to assign tasks, monitor legal actions and make prioritization of urgent cases and deadlines for planned activities thanks to a smart "To-do" function. Support at the examination of suspected counterfeits.

External registration

Provides possibility for external parties (e.g. local lawyers or investigators) to report suspected counterfeits, initiate cases and upload files and images directly into CaseMate.

Additional features

Operation management system. Connection with third party tools such as anti-counterfeit NGOs, web-monitoring tools etc.

Provides support for

- Case registration
- Identification check-list
- Assignment of tasks
- Tracking of actions
- Ping-pong communication
